REFERENCES (OVERLEAF)

The Applicant must nominate five reference customers for whom both project management and installation of optical fibre cabling infrastructures have been completed, and provide brief descriptions of the work carried out and the approximate values of these works. Three of the five references should cover a period of between two and five years ago. The others should be more recent. The applicant shall ensure that the named referees are willing to provide information to the FIA upon request regarding the work undertaken for them. The FIA will obtain written references from at least two of these companies using a pro-forma questionnaire. Should one of these references appear to be unsatisfactory, the applicant will be given the opportunity to commission an independent FIA audit of the relevant installation, at the applicant's expense.
