

The FIA requires that Certified Trainers are:

- knowledgeable in all aspects of fibre optics to a level beyond that required to pass the level II City and Guilds 3666 scheme;
- qualified, trained or experienced as trainers;
- practically experienced in the field of fibre optics.

Only trainers meeting FIA requirements for knowledge, training qualifications and experience will receive FIA Certified Trainer status, thereby being authorised to deliver and assess certain training courses for the purposes of the FIA Qualification Scheme. All trainers wishing to become FIA Certified Trainers must complete this Application Form detailing all relevant qualifications and experience. The FIA may request evidence of any details given on the Application Form.

The FIA will not accept applications from trainers with less than one years experience in the fibre optics, cabling or a closely related industry.
